

Rescue Urgent List

The animals contained in this notice are in immediate need of Rescue Partner assistance in exiting the shelter, as all animals on the list below are at risk of humane euthanasia.

Due to a serious health condition, temperament issue, or insufficient kennel space, humane euthanasia has been identified as the likely pathway out of the shelter for any animal with the status of **Rescue Urgent**.

Please do not delay in contacting us at the shelter at (909) 386-9820 if you are interested in adopting any animal on the list below.

The Rescue Urgent list is generated daily at approximately 4 PM. Rescue Partners have until 2 PM the following day to contact the shelter and arrange to pick up an animal from this list. Euthanasia may

Review Date:

Animal Condition: SICK

Shelter Medical History:

06/30/2025 06/30/25 Hair loss

06/30/2025 06/30/25 Observed cat with alopecia and crust spots bilateral dorsal carpus.

07/01/2025 presented for evaluation due to staff concerns for possible ringworm. staff performed woods lamp and skin scrape - both negative.

DVM exam:

BARH, moderately scaling round lesions affecting skin proximal to carpus bilaterally, left caudoventral abdomen, left lip, and RPL toe 5. Woods lamp exam - negative, however numerous hairs glowing blue present at all lesions / this is not classic for M. canis but may represent a different ringworm agent.

Skin scrape - negative.

Ideally pcr/fungal culture would be performed - currently no in house or send out laboratory services available.

rx:

selamectin 60 mg/ml 0.25 ml topically

itrafungol 10 mg/ml 0.55 ml po sid x 7 days, refill up to 2 times

monitor response to therapy, woods lamp weekly
